

DATA SHEET – 24:7 COPPER BOLUSES FOR LAMBS

Presentation

A hard gelatin capsule containing 2 g copper oxide, equivalent to 1.7 g copper

Uses

A dietetic complementary feed for the long-term supply of grazing lambs with copper. Agrimin **24:7 COPPER LAMB** are long acting capsules for the oral administration of copper to ruminating lambs. They are designed to maintain normal copper levels over the whole grazing season (approximately 180 days).

Simultaneous supplementation of additives with a maximum content from other sources to those incorporated in a capsule, if applicable, shall be avoided.

Before using, it is recommended to have advice from a veterinarian or nutritionist concerning:

1. The balance of trace elements in the daily ration
2. The trace element status of the flock

Administration

24:7 COPPER LAMB is intended for ruminating lambs over 20 kg liveweight. Administer one capsule per animal. Always use the recommended Agrimin lamb bolus applicator D

Contra-indications, Warnings etc

Do not administer to pre-ruminant animals. No other form of copper supplementation should be given immediately prior to or 6 months after administration of the capsules. Do not exceed the recommended supplementation levels. Caution is advised before supplementing house sheep and those breeds known to be susceptible to copper toxicity (e.g. North Ronaldsay and Texel).

Pharmaceutical Precautions

Do not administer to lambs less than 20 kg liveweight
Store in a cool, dry place
Reseal part used packs
Do not drop onto hard surfaces
Keep out of the reach of children

Legal Category

Dietetic complementary feed

Package Quantities

24:7 COPPER LAMB are packed in units of 250 (enough for 250 lambs).
